11/15/2004

Dear Helicycle Enthusiast:

It has been a while since we have been able to let you know that we are still producing the HELICYCLE© and re-manufacturing the T-62 turbine engine.

Production Group 3 will have received their engine contracts by the time you get this and many have already sent them back to us.

This week we finished mailing the airframe and engine contracts to Production Group 4. We only have 2 spaces left on that list. Let us know if you are wanting in on Group 4, as it has filled up quickly and we are hoping to close it out in the next 60 days or less.

Blake Estes has the men in the shop working full tilt on the group 3 blade packages. As soon as those leave the factory, they will be starting on the engines for groups 3 & 4. This is a huge task for them, but we have a terrific crew and they are working hard for us.

Our flight check outs have been coming fast and furious. Doug Schwochert who is the chief check-out pilot, has been putting in many hours to get the ships flying.

There were quite a group of builders with ships at all the airshows this last summer. We have enclosed a photo poster of Homer Bell's 20th annual fly-in. It was a wonderful show of our "Yellow Hat Gang". These are our current builders, many of whom are now flying their ships. We hope to see many more at the show's next summer. Plan to go to at least one, you will have the time of your life and will learn a lot from the builders as well as the factory representative. We have also enclosed some articles from a brand new magazine which came out this fall. It is called Experimental Helo Magazine and is full of great articles on all the different helicopters available. Call 760-377-4478 for information on how to subscribe to this magazine. It is published in Inyokern, CA, by Stuart and Kathryn Fields, long acquainted with the kit built aircraft market.

Some of our Florida builders had a hard time of it with those horrible summer storms. One family had the roof taken off, and another one lost a wall and all the wiring. We might suggest that they all move to Idaho. We have long, dull winters in which staying home, building your HELICYCLE would be very enjoyable and your family could help.

Through all that has happened this year, the Lord has blessed us with a wonderful and continuing customer group. We really appreciate all of you. God Bless You all.

Sincerely,

Carolyn Schramm
